

Orgone - What is it? And why do I even need It?

The need for orgone energy is very great today for every single life form because of all the pollutants and excessive electromagnetic frequencies that we live in!

Orgone is “Zero Point” energy.

It is an etheric energy that transmutes and transforms negative energies into positive energies.

We live in a “soup” of electro-magnetic energies. If we could see them, all would be crying out in alarm but since they are invisible, little thought is given to them.

Yet the havoc of the excessive frequencies is wrecked on our bodies, mind and spirits and the bodies of animals and all of nature.

Orgone Harmonizers transmute these energies and create a safe haven for us to live in.

What are the results?

- * Health and well being are enhanced.
 - * Creates a calmer environment
 - * Transmutes negative energy.
 - * Works continuously,
 - * Animals and nature love it and feel better in the presence or orgone.
 - * Plants grow larger and healthier.
 - * Repel insects.
 - * Purifies water.
 - * Mitigate harmful effects of EMF radiation.
 - * Can remedy insomnia and nightmares.
 - * Easier to meditate.
 - * Helps the healing process on all bodies.
- Just to name a few of the benefits.

How does Orgone work?

In 2000, researchers have found that mixing resin with metal and crystals would attract etheric energy that would be of great benefit to nature and all life forms.

Why does it work? That is still an unknown but scientists are researching more and more of the etheric unseen energies and learning how to work with them.

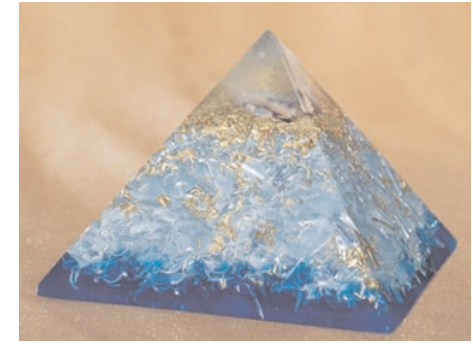

Orgone is an etheric energy and just as we need containers for everything in 3D, the orgone harmonizers are containers and generators for orgone energy and help to ground it in 3D.

Orgone is the Life Force Energy and at the present time, the Life Force energy on the planet is low except where the orgone has been placed

An Orgone Rose anchoring the Honor Flame from the Great Central Sun!

Go to www.loveoftheearth.com to see regular orgone and orgone with special frequencies. Learn how to create a Violet Flame temple in your home and reap tremendous benefits for yourself, neighborhood, city and world.

What has orgone done so far for the world?

- * Brings nature into **BALANCE** wherever it is put.
- * It has brought back the rains and crops are growing much better wherever it is placed.
- * Almost every country has some orgone it in now because of some very generous people, called “gifters” who are concerned about the environment that we live in, dip into their own pocket book and are **doing something about it!**
- * It has stopped damaging storms.
- * Helps to bring healthy energies into our bodies.
- * Somalia is over the drought and famine because of 1 gifter there who given orgone to the farmers and fishermen. The crops are growing better than ever and there is food for all life forms now.

* Highly polluted lakes and rivers become pristine again after orgone has been placed in them.

And the success stories go on and on- all because 1 or 2 people cared and chose to make a huge difference.

Take the time to create **YOUR environment!**

Create a Violet Flame Temple in your home!

The guidance came through to create a **Violet Flame Healing Temple** in my home.

A Ceremony was designed to anchor in this energy and it is amazing!

This affects all in the home, the home itself, the neighborhood, the city and the whole planet!

The healing that comes from this is very gentle, elegant and reaches into deep subconscious areas.

As much healing as I have done, the **Violet Flame from the temple** in my home has reached into areas that no one could get to before! It has gone much deeper than just working with the Violet Flame without anchoring here on the planet!

What a blessing to all of the world as more and more of us create our own Violet Flame Healing Temples in our own homes!

**Create your
Own Environment!**

**Create your
own TEMPLES in
your homes!**

Do crystals alone do the same thing as crystals in the presence of metal and resin? **NO!** If they did, we would not have had any droughts nor would we be plagued with excessive electromagnetic frequencies.

Crystals under the pressure of resin in the presence of metal do this. This is also the natural environment of the crystals when they are in the earth.

The Crystals are most happy to work in the matrix of Orgone!

And what a gift for all life on the planet!!!
